

Ghizlane GHAYA

I'm a recent graduate looking for a new professional opportunity. With a solid background in Python programming and familiarity with CI/CD tools, Kubernetes, Docker and other relevant technologies.

I'm keen to contribute to innovative projects and work as part of a team to achieve common goals.

EDUCATION

Software Engineering

[From 2019 to 2024](#) National School of Applied Sciences (ENSA) Khouribga

Software Development

[From 2022 to December 2024](#) I337 Khouribga

SKILLS

DevOps tools

- Github / Docker / Jenkins / Kubernetes / Docker Swarm / Minikube

Programming languages

- Python / C / C++ / Java / JavaScript

Frameworks Flask / Django

Base de données:

- Oracle / Mysql / Postgresql / MongoDB / Hbase / Neo4j

systèmes d'exploitation

- Linux / Windows / debian

Modélisation et Conception

- Merise / UML

PROFESSIONAL EXPERIENCE

DevOps Engineering Intern

[From February 2024 to June 2024](#) Morosoft solution Casablanca

Design and implementation of a DevOps CI/CD pipeline for a cloud application:

- Automatic testing of new features to ensure compatibility with other features.
- Builds and automatic deployments.
- Creation of a backup system to ensure data recovery .

Technologies: Jenkins , Github Actions , Docker Swarm

Full-Stack Developer Intern

[From July 2023 to August 2023](#) Umóp Benguerir

design and development of an innovative web application based on real-time detection of personal protective equipment (PPE).

Technologies : Python (Flask) , Javascript (React)

Full-Stack Developer Intern

[August 2022](#) Pôle mines groupe OCP khouribga

Development of a desktop application to manage internship documents.

Technologies : Javascript , Electron js

PROJETS ACADÉMIQUES

Inception This project consists in set up a small infrastructure composed of different services under specific rules :

- Virtualization of multiple Docker images.
- Creation of custom Dockerfiles for each service.
- Configuration of Docker Compose to manage container connections and volumes.

Technologies : Docker , Linux , VirtualBox , Wordpress.

Entertainment Web Application Design and development of a web application where users can play Pong and chat with each other in a friendly and secure environment.

- Technologies : NextJs / Django / Postgresql / Docker

Born2beroot This project involves setting up a server, where we explore the world of virtualization, partitioning schemes, LVM (Logical Volume Management), command-line tools, and protocols such as SSH.

- Technologies : Debian , Virtual Box , Linux
